

ECHO LASER CUTTING MACHINE

Product Description

Garment CAD&CAM-Laser Cutting Machine:

- 1.Coordinate clothing CAD could it immediate design and immediate output the cutting sample piece, geminated enhance the design speed.
2. Has the unique superiority to the special material, stuff cutting side like the seamless underwear lining, the ski clothes lining, the tent, guard material and so on.Has the characteristic of automatically receives, no beard edge, high precision, fast speed and so on
- 3.Coordinate multi-layer feed control installment, can do the continual multi-layer cutting process, carries on the batch production;
- 4.For surpasses the cutter pattern after the typesetting the design, may automatic continuously output the processing at different times, make automatically melts the production continuously to reality
- 5.The unique advanced machine design, the path of rays design guarantees the equipment to be able to stabilize the normal continual work, and the maintenance is simple.
- 6.You can use the camera to take the outline of the large and abnormity's materials, then set up the types and cut the materials.Such as the leather
